Hosted by

Universiti Malaya Medical Centre – Medical Research Ethics Committee

In collaboration with: UM Research Ethics Committee (UMREC), UMMC Clinical Investigation Centre (CIC), UM Medical Humanities & Ethics Unit (MedHEU), UM Faculty of Dentistry Medical Ethics Committee (FDMEC)

Theme: Ethical Research Practices Related to Innovative Research Challenges and Opportunities

We live in an era of evidence-based policy and practice that relies on scientific reasoning capable of gathering useful scientific information that should be integrated with a comprehensive understanding of consumer/ patient values and social needs. Research is important to generate new knowledge and insights that could improve people's health and welfare. The exponential increase in knowledge has created a demand for knowledge-based systems that make use of innovative technology like artificial intelligence and novel approaches to enable wider use and popularization. All these knowledge and innovation will prove to be a boon or a bane depending on how they are utilized to promote the quality of life of the population. Ethics becomes crucial to ensure that the benefits of new knowledge and novel technology accrue to social good and amelioration.
