Guideline to Submit an Article with Morressier Submission

4th International Symposium (Hybrid) of Earth, Energy, Environmental Science and Sustainable Development 2023

1. About JESSD Symposium 2023

Journal of Environmental Science and Sustainable Development/JESSD (<https://scholarhub.ui.ac.id/jessd/>) is a biannual refereed journal that provides an opportunity for academics and practitioners well as community representatives to examine, exchange, and reflect on a wide range of issues related to environmental science and sustainable development. JESSD is published by the School of Environmental Science, Universitas Indonesia, Jakarta.

This year, JESSD is proud to hold its fourth international hybrid symposium. Journal of Environmental Science and Sustainable Development is pleased to announce the 4th International Symposium (Hybrid) of Earth, Energy, Environmental Science and Sustainable Development 2023, which will be held at the Central of the Capital City, Jakarta, on August 26th-27th, 2023. This event aims to be the leading annual conference in the research field related to science, energy, and environmental science, with more specific topics on Cleaner Production, Environmental Management and Protection, Environment during Post Coronavirus Disease 2019 (Covid-19) era, and Community Empowerment in Environmental Sectors. We encourage researchers, scientists, intellectuals, and professionals worldwide to present their advanced research for a better environment.

Originally a natural lake of marshland, Situ Gintung was later created to benefit the local community. This lake fell in 2009 due to its inability to withstand the rushing water. This tragedy impacted many sociological and economic aspects of society. The purpose of this study is to assess the value system's impact on the interview and observation process. The study took place near Situ Gintung. The study ran from March through June 2011. Among the informants were victims of the Situ Gintung disaster, local inhabitants who knew the history of Situ Gintung, and the South Tangerang Regional Government. This study's findings imply that people's concern for one another is expanding. It has shown great care and togetherness via cooperation, community service, and attending neighbors' weddings. Residents, on the other hand, tend to take care of their own requirements, whether family or personal. These residents are citizens that stay in touch with or greet their neighbors when needed. In the event of a future natural disaster, the community will come together to help and understand.
